

MASSIMILIANO BASSAN

◆ ◆ ◆ ◆ Web Designer

ABOUT ME

I am a web designer and graphic editor, technology enthusiast who loves team work.

I discovered HTML when I was 13 and I have been using Photoshop and Premiere since the age of 15.

I feel curious about everything, passionate about creating and discovering my skills. That's what motivates me in my daily work.

EXPERIENCE

JUNIOR WEBAPP DEV at Omicron Consulting

Mar 2020 - Sept 2020

I initially built small Web Application back-end prototypes using Spring, Hibernate, JPA, Rest API, MySQL. Later an UI built on a preexisting back-end using HTML5, CSS3, Javascript and React. Finally, following predetermined specifications, I developed a function integrated into a management portal, an internal product of the company itself.

Spring, Hibernate, JPA, Rest API, MySQL, HTML5, CSS3, Javascript, React, VSCode, IntelliJ IDEA, Git, Postman, Docker.

WEB DESIGNER as Self-employed

Dec 2013 - Sept 2019

I have created several websites over the years, on my own or cooperating with other professionals in this field. From the graphic prototypes to the creation or modification of the existing themes implemented using a CMS, from the management of the hosting to the creation of the basic contents.

Wordpress, Plone, CSS, HTML, Javascript.

GRAPHIC/VIDEO EDITOR as Self-employed

Dec 2013 - Oct 2021

I produced different kinds of graphic materials, both for printing and as a content-creator for the Web. I was able to work and cooperate with different realities and in different fields, from public entites (Municipality of Abano Terme, Municipality of Montegrotto Terme) to private ones (Civic list Riccardo Mortandello Mayor, Civic list Nuova Montegrotto, Civic list 35031, Cinema Teatro Marconi, Enoteca Ombra che Conta, Roberta Sorgato author).

Photoshop, Premiere, Illustrator, After Effects, Audition.

EDUCATION

Information Engineering at University of Padua

Ott 2014 - Dic 2018

I attended the faculty of Information Engineering at the University of Padua. Through these studies I learned the correct mindset for solving problems by breaking them down. I also learned important concepts of Basic Programming (Java), architectures of modern elaborators, statistical data analysis, data structures and algorithms, theories of systems, analog/digital signals and project management.

Highschool graduation at Liceo Scientifico Enrico Fermi

Set 2007 - Lug 2012

I graduated in 2012 from the Liceo Scientifico Enrico Fermi. I learned notions of advanced mathematics, fundamentals of technical drawing but also Latin culture, history and philosophy.

Advanced course on software development using Java to design efficient back-ends for Web Applications in MVC architecture.

Design Pattern, Maven, J2EE, MySQL, Spring, REST API.

SOFT SKILLS

PROBLEM SOLVING

It is a mindset gained through my studies and grown in working alone or with a team achieving simple or complex projects.

ASSERTIVENESS

I'm proficient in speaking with everyone with a discreet ease and politeness in every situation.

TEAM WORK

I'm able to be synergic and structured in my work also and mostly working as a teammate. I can cooperate and with the others bringing value and professionalism to the team.

INDIPENDENT WORKING

I can work alone on projects or tasks given to me in complete autonomy, listening to external feedbacks without losing sight of the main goal.
